September 28, 2026

Mr. PRESLEY R. SILVESTER
Human Resource Manager
Valve Corporation
Bellevue, WA 98004
United States

Dear Mr. Silvester,

Greeting

I am writing to apply for the Junior Software Developer position at Valve Corporation. I graduated Magna Cum Laude with a Bachelor of Science in Information Technology from Caraga State University on July 27, 2029, and I am eager to start my career with a company known for creating Steam, one of the largest PC gaming platforms in the world, and for iconic games such as Half-Life, Portal, and Counter-Strike.

Through my coursework and projects, I have built a solid foundation in Database System Management, Object-oriented programming in Java, and Web Development. I have designed and managed relation databases, developed Java applications and Mods, and built a web-based systems from planning through implementation. These skills connect directly to the work behind a platform like Steam, which depends on reliable data handling, well-structured softwares, and a smooth web experience for million of users.

I am also a fast learner who enjoys tackling unfamiliar tools and problems. My general education and communication courses have strengthened my ability to explain technical ideas clearly, which I believe is valuable when collaborating with both technical and non-technical colleagues.

I would welcome the opportunity to discuss how my skills can contribute to Valve. I have attached my resume for your review and am available for an interview at your convenience. Thank you for your time and consideration. If you have any queries, you may email me at asilojohnmichael@gmail.com

Sincerely,

JOHN MICHAEL C. ASILO
APPLICANT
